Financial Management Track

Track Chairs:

- Konstantinos Bozos, University of Leeds, UK
- Shima Amini, University of Leeds, UK
- Hossein Jahanshahloo, University of Manchester, UK

The Financial Management track provides a forum for academics and practitioners interested in financial and related professional services along with the impact of finance on management practice and research. It aims to encourage interdisciplinary thinking and collaboration across fields that span corporate finance, management, international business, regulation, decision sciences and economics. It welcomes empirical, methodological, and theoretical research that has a focus on the firm or the manager as the principal unit of analysis. Papers need to have clearly identified managerial or firm governance implications.

For BAM2027, we invite both theoretical and empirical contributions across all areas of finance and financial management, including but not limited to the following topics:

Advances in Methodology
Alternative Investors and the Firm
Behavioural Finance
Blockchain Technologies
Capital Markets
Capital Structure
Corporate Finance (Empirics)
Corporate Finance (Theory)
Corporate Governance and Boards
Corporate Social Responsibility
Credit Risk and Bankruptcy
Cryptocurrencies
