## **BAM2023** Doctoral Symposium **Poster Presentation Guidelines**

## Monday, 4th September 2023

- The poster presentation will be displayed in the Marquee, Jubilee Building, University of Sussex, where we will also be having coffee breaks and lunch. Consequently, all posters will be accessible to the audience during the breaks.
- Please be aware that printing services will not be available at the venue, so please arrange this in advance of the Symposium and bring your printed poster with you.
- Delegates presenting posters will be expected to engage participants in discussion about their poster during one of the breaks.
- Each accepted poster presentation will consist of one A1 (A frame size) poster (portrait orientation, as in the attached example).
- The top of your poster should give the title of your poster and your name, you are free to fill the remainder of your poster as you see fit.
- An effective poster will help you engage colleagues in conversation and get your main point(s) across to as many people as possible. An example poster is provided at the end of this document.

• There are numerous a good poster

websites with hints and tips for preparing presentation. For example:

# SURREY Managing organisational knowledge

## to enhance innovation capability in Thailand's functional food sector

Life expectancy and Faculty of Management and Law Doctoral Students' Conference 2010 21" June 2010, School of Management, University of Surrey health consciousne

Student name:

Mr Chaiyatorn Limapornvanich

Supervisor name: Dr Mark Gannon

**Dr Margaret Lumbers** 

### Research Problem

Companies in the food industry need to cope with changes with globalisation, technology, cost competition and purchasing behaviours.

Management of knowledge is required to underpin development of new knowledge-intensive products and processes.

#### Innovation and Capability in an Organisation

The direction of a company in the future depends on its own capabilities: level of technology, skills developed, intellectual property, managerial processes and its routines (Teece and Pisano 1994).

#### **Functional Foods**

"is a food affecting beneficially one or more target functions in the body, beyond adequate nutritional effects, in a way that is relevant to either improved stage of health and well-being and/or reduction of risk of disease; it is not a pill or a capsule, but part of the normal food pattern"

#### Research Aim

To understand the relationship between innovation capability and knowledge management which could support innovation performance of a knowledge-intensive company.

#### Significance of the research

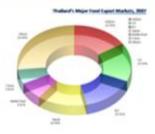

Managing organisational knowledge effectively can enhance the abilities to manipulate, facilitate, and synchronise external and internal knowledge which be required for development of new knowledge-intensive products, especially in functional food sector.

The value of knowledge could be claimed by its movement, flow, or growth which consequently lead to generation of new knowledge.

Knowledge Management

#### Thai Food Industry

in 2006, additionally, functional foods totalled \$31.4 billion out of \$130 billion healthy foods and \$566 billion in U.S. Food, with 10.2% growth

Industry fact file:

- . Ranked as the world's 16 of food exporter (2007)
- . Gained \$24.2 billion revenue (2008)
- . Key comparative advantage is natural resource
- . Most raw materials (>80%) are sourced locally at low prices
- Food processors turn their focus into value-added products

#### Thai industrial case:

"Patum Rice Mill, one of leaders of Thai rice exporters, initiated a collaborative project with Kasetsart University to research and develop germinated brown rice product, 'NUTRA GABA RICE', which could function to help maintain blood pressure and blood sugar level."
